

## Studying at MLS

We took some pictures inside our General English and Business English classes this Summer – to give you a look inside MLS.

Although the maximum class size is 14, the average is generally lower and students benefit from a relaxed environment where they can express their opinions, whatever their language level.

All MLS teachers are well qualified and many have professional experience in business and industry, which means they have specialist expertise to bring to the lessons. Classes are effective and challenging, but they are also friendly and student centred with everyone encouraged to contribute – as you can see from the atmosphere in the photos.

In General English classes all of the skills are practised through the daily schedule with new grammar and vocabulary presented in the first class; reading and writing in the second; and speaking and listening practised in the afternoon through the study of Communication & Culture.

In Business English the format is similar except that the language is the language of business and the second class is practical and interactive giving students the chance to practise their English in meetings, presentations, interviews and many other relevant business scenarios.
